Student's Workshop on

Google Earth Pro

Key features of the Workshop

This workshop will help students to get familier with the Google Earth Pro, which is a computer application developed by Google to represent the globe in 3D using satellite imagery and vector information. It also provides numerous tools to perform several

- GIS based analyses and productivity.
- The workshop is targeting students that may require GIS based project works in their respective subjects.
- It will help students to identify and use tools available in the programme.
- Workshop will cover:
  1. Importinng Data (GPS, KML, KMZ)
  2. Digitizing Tools
  3. Survey and Measurements
  4. Business Analytics
  5. Overlays
  6. Tour
  7. Movie Maker
  8. Flight Simulator
